

QUICK TIP DRESSING KIT

Here's a quick and convenient way to dress the weld face of your spot welding tips while eliminating clutter!

The T. J. Snow **QUICK TIP DRESSING KIT** comes complete with a pneumatic tip dresser with cutter blades to suit and an adjustable machine-mounted “hockey stick” hanger which can be mounted at any height and in any direction. The adjustable-tension **TECNA** air hose spring balancer allows the operator full range of motion while dressing upper and lower spot welding tips.

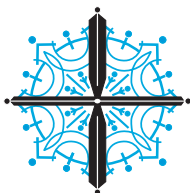

Work station clutter and lost tools are a thing of the past!

STANDARD COMPONENTS:

- Pneumatic Tip Dresser
- Cutter Blade and Chuck to Suit
- TECNA Spring Balancer
- Adjustable Hanger
- Mounting Hardware and Fittings

The **TECNA Air Hose Spring Balancer** is the heart of our **QUICK TIP DRESS KIT** because it connects the tip dresser's air hose directly to the welder's air system. The spring balancer suspension system keeps the hose off the ground and enhances work station safety.
